## INTRODUCING THE ALL-NEW BARRETO 20RTK/23RTK STAND ON TRACK TRENCHER

The all new RTK Stand-on Track Trencher from Barreto features a fixed platform and unique fine tuning control adjustment that uses rod linkage instead of cables. The new Adjustable Trenching Control (ATC) can be placed into position to modify the trenching speed of the tracks individually while on the go. Individual track controls can be adjusted separately during operation allowing the operator to keep their trench straight when working on uneven terrain. Simple, one-handed controls are easy for any operator, and the boom pivot design keeps high maintenance components out of the dirt, reducing wear.

# ROME

Manufacturing Heavy Duty Construction and Agricultural Implements Since 1932

## ROME PLOW COMPANY IMPLEMENTS

The ROME brand name has always been tied to heavy duty Construction and Agricultural disc plows.

ROME continues to manufacture the same style of implements that has made the ROME PLOW brand name famous for over 80 years.

ROME also manufactures pivot dump and ejector scrapers for the AG and Construction Industries.

This includes a full line of Earth Moving Scrapers and precision land levelers, such as land planes and float planes.

For more information on our products or for the closest authorized ROME dealer please contact us.

**Jay Leno Named Work Truck Show 2016 Keynote Speaker**

Jay Leno, comedian, author, car builder and longtime host of “The Tonight Show with Jay Leno,” will serve as keynote speaker at The Work Truck Show® 2016. His address will take place Thursday, March 3, as part of the President’s Breakfast & NTEA Annual Meeting.

The Work Truck Show, North America’s largest work truck event, is produced annually by NTEA – The Association for the Work Truck Industry. The 2016 event will be held March 2–4 at the Indiana Convention Center in Indianapolis, Indiana. Educational programming, including the Green Truck Summit, begins March 1.

Please note: A ticket is required to attend the President’s Breakfast. Tickets cannot be purchased until registration for The Work Truck Show 2016 opens in October. Visit [ntea.com/upcoming-events](http://ntea.com/upcoming-events) to sign up for email notification when registration is available.

The Work Truck Show brings together more than 11,000 truck fleet managers, dealers and equipment distributors annually. It features the newest vocational trucks, vans, components and equipment, as well as educational sessions tailored to help attendees better run their companies.

**STIHL Inc. Opens Midwest Location**

STIHL Inc. celebrates the grand opening of its new Midwest STIHL location in the Village of Cottage Grove, Wis. In January it was announced that STIHL Inc. would relocate the operations of Mississippi Valley STIHL of Peoria, Ill. and Midwest STIHL Inc., of Hayward, Wis. to establish a new single distribution site. Completed in October, after only six months of construction, the new 65,750-square-foot facility demonstrates the company’s continued investment to improve overall operations and support dealer growth in the mid-northern region of the U.S.

“We are extremely pleased to celebrate the opening of this new distribution location because it represents our continued focus on serving our dealers and customers more efficiently,” said STIHL Inc. President Fred Whyte, who attended the ceremony.

STIHL selected the Village of Cottage Grove for its access to the I-90 and I-94 corridors that are main routes for deliveries to STIHL dealers.

In addition to a central location, the new facility was designed to drive efficiencies to further enhance dealer support and responsiveness.

**Northwest Parts & Equipment Becomes Takeuchi-US Dealer**

Takeuchi-US, a global innovation leader in compact equipment, has announced Northwest Parts & Equipment as a new dealer, serving western Montana. The full-service dealer has three locations in Montana, including their headquarters in Columbia Falls and smaller stores in Butte and Missoula. Northwest Parts & Equipment will carry Takeuchi excavators, skid steer loaders, track loaders, and wheel loaders.

Founded in 1981 by Gary and Peggy Hurd, Northwest Parts & Service is a family owned company and serves the logging, mining and construction industries. The service department is staffed with factory-trained technicians capable of working on most makes and models of equipment either at their shop or at the customer's location. The parts department has the product and expertise to help get the most value for the customer's dollar with either new, used or rebuilt replacement parts.

"We are excited to add Takeuchi to our line and we believe that they are a great fit," said Chris Hurd, Marketing Manager at Northwest Parts & Equipment.

**Martin Rola Joins WAGNER Systems, Inc. as General Manager**

WAGNER Systems, Inc. is pleased to announce Martin Rola has joined the organization succeeding Matthias Koehler as General Manager. Matthias has lead Wagner Systems Inc., for the past four years and will remain with Wagner Systems until mid-2016, when he will be assuming a new leadership role in Germany. Martin Rola will transition with Matthias over the next few months to officially assume the role of President Americas for the Industrial Solutions business at the start of the new fiscal year. This new role will cover all of North and South America and will encompass the entire product range of Industrial Solutions.

Martin comes to Wagner from Apex Tool Group where he has been part of the Global Power Tools Division since 2011. During his tenure at Apex Tool, he held such roles as Global General Manager and Vice President for the Motor Vehicle Industry, General Manager and Vice President Americas, and Vice President Global Marketing and R&D. Prior to Apex Tool Group, Martin was with Fanuc Robotics Paint Shop Automation Division and General Motors and has 25 years of industry experience.

# RUGGED PROTECTION

FOR YOUR FORKLIFT'S BATTERY

## RUGGEDIZED SHUT DOWN TIMER

- Designed to protect your vehicle's battery from over discharge
- Programmed to automatically turn off electrical loads at a low voltage battery level, or at a preset time after the vehicle's ignition has been shut off
- No special tools required for installation
- Potted to protect against heat, moisture and humidity
- Can be installed in a vehicle or forklift's engine compartment (12V or 24V inputs)

To learn more about how Lind's **Ruggedized Shut Down Timer** can meet your mobile power needs, contact Lind at **1.800.897.8995**, via email at [info@lindelectronics.com](mailto:info@lindelectronics.com) or visit us online at [www.lindelectronics.com](http://www.lindelectronics.com).

POWER SPECIALISTS FOR  
MOBILE COMPUTING

# COMPANY PROFILE

# Kenco

**eo Corporation**

Since 1984, Kenco Corporation has been manufacturing unique lifting attachments for use in the construction and demolition industry. Kenco lifting products can be attached to any excavator, wheel loader or backhoe machine with the lifting capabilities required for the job. The versatility and increased productivity that is gained through using Kenco attachments have made them an integral part of road and bridge construction, water and utilities, landscaping, and other projects.

Kenco's top selling product is the Barrier Lift. It can be used to move concrete barriers, sound walls, curbing or piling. It is not unusual to see it performing along the highways, as it is utilized by DOT's in all 50 states. These lifters have a fully automatic grab and release action that allows barrier to be handled from inside the cab. As it is lowered onto the wall, the lifter grips the sides of the wall tightly. The wall can then be lifted and carried and will not release until the wall has been set firmly into position. It is ready for immediate operation by just attaching a shackle to the lifting eye and can be used on any type or model of machine with rated lifting capabilities. Nine different models are available in capacities from 1500 to 40,000 pounds.

The newest Kenco product was introduced in November - a totally redesigned Multilift. What makes this attachment so unique is that the legs are adjustable to widths up to 68 inches. These new V1 models automatically grab and release precast objects weighing up to 4 tons. An innovative feature is the addition of a lever that flips to free the legs for width adjustment rather than having to remove and re-align pins. The lever flips down to unlock, allowing the legs to slide freely along the shaft of the lifter. Once the legs are in the preferred position, the lever is simply flipped once again to lock the width. This all new design has more travel than its predecessor and will accommodate widths that vary up to 5 inches without any readjustments. This attachment can be configured to grab from the outside or from the inside out for culvert boxes, simply by reversing the leg orientation. The Multilift can be used on any machine with lifting capabilities. There is no need to attach additional hydraulics. It hooks up with a typical sling and shackle assembly. Optional modified legs featuring free-pivoting pads to grab curved surfaces such as manholes are also available. The Multilift comes in 3000 and 8000 pound capacity models.

Whenever it involves heavy lifting on highway, bridge, utilities, quarry or other projects, Kenco has an attachment to make the task easy. See the entire line of lifting attachments at [kenco.com](http://kenco.com)

Kenco furnishes attachments for excavators from mini to 200,000 pounds, wheel loaders from 1 to 40 yards, dozers, and skid steer machines.

# Mi-T-M Celebrating 45 Years of Innovation

Mi-T-M Corporation is a privately held Iowa-based company that is celebrating 45 years of innovation and its commitment to excellence. From the time Mi-T-M was founded in 1971 by A.J. Spiegel, the flagship product was and still is an industrial-grade cold water pressure washer. Since then, Mi-T-M has expanded its product line to include 100s of high quality and dependable product. Located in Peosta, Iowa the Mi-T-M Corporation employs over 400 people in a nearly 1 million square-foot state-of-the-art manufacturing, assembly and distribution facility.

Mi-T-M's customers span multiple industries, including: OEM, rental, paint, government, consumer, equipment distributors, and water treatment facilities.

Along with the Mi-T-M brand, Mi-T-M builds OEM or Private Label products for: John Deere, Sunbelt Rentals, Bobcat, Sherwin Williams, United Rentals, Gardner Denver, Dayton, Dunn Edward Paints, Grainger, NAPA, Champion, RSC Rentals, Hitachi, Speedaire and Senco.

*Products:*

The Mi-T-M Corporation manufactures industrial-grade products in the following categories:

- Cold Water Pressure Washers
- Hot Water Pressure Washers
- Air Compressors
- Generators
- Air Compressor/Generators
- Wet/Dry Vacuums
- Jobsite Boxes
- Water Treatment Systems
- Portable Heaters

*Certified Testing Facility*

Mi-T-M is a certified testing facility and is qualified to apply the CSA mark of safety assurance to its equipment. In 2007 Mi-T-M began manufacturing air compressor vessels and is authorized to apply the ASME Code to machines that have been built in accordance with the ASME Boiler and Pressure Vessel Code.

# Company Profile: Stephens Mfg.

Since 1957 Stephens Mfg. has been helping build America by ensuring that contractors have had an uninterrupted affordable supply of the materials they need. We have evolved and grown to meet this unprecedented need with state of the art efficient and profitable concrete batch plants. Today, Stephens Mfg. proudly offers a complete line of portable and stationary concrete batch plants that have passed the test of time delivering dependable performance year after year.

All of the Stephens plants are designed and built for seismic and wind loads depending on the operational location. This ensures your plant will meet local requirements and building codes. Unlike our competition, we consciously have chosen to guarantee our customers that every plant made by Stephens Mfg. will meet the local seismic, and wind loads for their job site.

Over the past eight years, many companies were contracting to weather the tough economic storm. We have expanded both our services and equipment, and we have three new portable concrete plants (Falcon, Mustang and the self-erecting Clydesdale), a new central mixing drum (The Stephens Workhorse), self-erecting Pony Express silo and a New Portable (RCC) Mixer.

**The NEW Falcon Plant** is an extremely large portable plant. The structure is designed to support two 1069 bbl silos and a 200 ton aggregate. This plant can safe on several loads of freight and reduces the required foot space for a plant giving more room for ready mix traffic around the yard.

**The NEW Mustang plant** is a mobile in truss silo style plant. The silo is a 400 bbl and the bins are 70 tons. This plant is great for easy and quick installation and moving from site to site. This will give Stephens two "in-truss" style plants. The larger and much faster Eagle plant and the NEW more mobile Mustang.

**The New (RCC) Portable Mixer** uses the Sicoma (twin shaft) mixer and it was designed to convert any existing dry batch plant into a central mix and RCC plant.

The mixer can batch over 5yd of RCC concrete per batch (6yd, 8yd and 10yd mixers available), and it can produce over 200 yards per hour if the dry batch plant can supply the necessary concrete. Stephens can offer hydraulic options for leveling jacks, unfolding conveyor and raise/low-er the truck collection hopper. The truck

collection hopper will allow the mixer to load standard ready mix trucks and/or dump trucks.

**Stephens Mfg. also recently acquired the exclusive right for a reversing drum mixer "THE STEPHENS WORKHORSE MIXER"**. Stephens Mfg. Co., Inc., a world leader in the manufacture of concrete batch plants, and ISL Machinery, Inc. located in King City, Ontario, the designer and marketer of the Inventure

Reversing Drum Mixer have entered into an agreement whereby Stephens owns exclusive rights to manufacture and market the Inventure Mixer in the United States, Canada and the Caribbean.

**Self-erecting PONY EXPRESS silo** 412 bbl. in truss silo with single axle transportation system. Includes 10" high speed screw. Designed with or without hydraulic system to raise silo. Two designs available; with or without skid base frame. With skid frame concrete foundation or slab may not be required.

**The BRAND NEW "self-erecting" CLYDESDALE plant.** The newest in the line of Stephens plants is a low profile self-erecting plant. The self-erecting plant can have accumulating or decumalating aggregate scales, with maximum of 100 ton agg storage. Cement silo is 385 bbl. single compartment, with 14yd cement batcher, 30" or 36" transfer conveyor, 3" water meter and 15hp air compressor. The silo has two single-stage cylinders to erect silo and the plant has four hydraulic lifting jacks. The plant is skid frame based to reduce the need for concrete piers. The plant was designed for quick and easy installation. Quick connect electrical connection can be available on the auxiliary silo and conveyors.

Stephens still continues their long line or reliable portable and stationary concrete plants. The Empire and Stallion stationary plants are still our heavy duty plants. We still have the DC-Colt decumalating plant, our "bread and butter" Thoroughbred portable plants and the super fast Eagle portable plant. We manufacture a complete line of equipment to complement our plants. Truss conveyors, Radial stackers, Flyash silos, screw conveyors, central dust collectors and ready mix reclaimers are just a few of the items we build to complete your plant needs.

Whatever your equipment needs Stephens has a plant for you.

# “Don’t Make a “Shovel Choice” When Selecting a Transport Vehicle”

*You wouldn't choose a shovel to dig a trench, when a mini-excavator is available to do the job faster, easier, safer and with greater overall economy.*

**So why choose a roll-back instead of a Retriever?**

*Developed in the 1960's... and not much has changed since.*

*Loading construction equipment onto a transport truck is inherently hazardous, made even more so by the roll-back's steep load angle.*

*To make it really dangerous, add some rain or snow, maybe a little oil or any kind of machine malfunction. Relying on the parking brake to hold a heavy machine in place on a steep deck is another unnecessary risk.*

*Retriever eliminates those risks, while speeding the loading/unloading process.*

*Retriever was introduced in 2002... and it's been getting better every day.*

**The First New Idea in Equipment Transport in 50 Years**

## **Retriever is a Simpler, Easier-To-Use, Safer and More Economical Way to Get The Job Done.**

**Patented Curved and Hinged Deck**

**Low Deck Height/Shallow Loading Angle**

**Exclusives! No Hydraulics!  
No Idle™ System**

**Greater Payload Capacity**

**Fewer Moving Parts**

**E-Primed plus Powder Coat Finish**

**Aircraft Carrier Quality Slip-Resistant Deck**

*There Isn't a Competitor That Can Match Us*

**RETRIEVER** by VERSATRAN<sup>INC.</sup>

**Two New Light Towers From Atlas Copco**

Atlas Copco Construction Equipment launches two new light towers — the HiLight V4 and the LED HiLight V5+. The HiLight V5+ minimizes operational costs with its long-lasting LED bulbs and fuel-efficient operation. The HiLight V4 features four metal-halide floodlights to give contractors a dependable light source for a variety of jobsites. Both models are lightweight, compact and feature Atlas Copco’s exclusive HardHat® canopy for extreme durability in rugged applications, such as construction and roadbuilding.

“For their crews to be successful, contractors need equipment that is cost-effective to operate, durable and safe. Those three points are always key drivers for innovation,” said Michael Sagermann, Atlas Copco business line manager, portable energy division. “That’s why we incorporated our exclusive HardHat canopy and designed the HiLight V5+ with a compact footprint, LED lights and retractable mast.”

The LED floodlights are rated for 10,000 hours and are durable to withstand a range of challenges, from vibrations during transport to harsh work environments. Contractors with a fleet of 200 light towers, for example, can save as many as 600 bulbs each year when switching from metal-halide light towers to the HiLight V5+.

**Empire Level Introduces the New True Blue I-Beam**

Empire Level continues to upgrade their line of layout products with the introduction of new True Blue® I-Beam Levels, Made in the USA. Available in both magnetic and non-magnetic models (24” to 78”), Empire Level is committed to delivering innovative solutions designed to satisfy the needs of the modern jobsite.

The e55 Series True Blue® I-Beam Level offers superior performance in all key areas of user needs and functionality. Exclusive high contrast vial surrounds provide industry leading visibility in all light conditions and feature high impact acrylic e-Band™ vials for unmatched durability. Empire’s e-Band™ vials also include patented blue-bands to maximize bubble meniscus visibility and are accurate to within .0005” per in. in all working positions. The all metal, I-Beam frame construction guarantees long-life accuracy and is equipped with impact resistant end caps to withstand the harshest jobsite conditions.

For added utility, the e55 Series features a top-read window for clear overhead viewing & has built-in molded grip zones for enhanced portability.

**Hino Trucks Announces Custom Paint Options**

Hino Trucks is pleased to announce custom color paint options for all conventional trucks beginning with 2017MY. Hino will now offer a wide variety of exterior truck colors that customers can order as a factory option or color match to their customized request.

“Inside the Hino cab and under the hood, Hino offers the most comprehensive package of standard features in the market. At Hino, we strive to achieve a higher level of customer satisfaction and these customizable paint options have yet again raised that bar. The availability of varying paint colors now provides customers with a convenient way to make their truck uniquely their own or create a visually harmonized truck fleet,” said Glenn Ellis, Vice President of Marketing, Dealer Operations and Product Planning for Hino Trucks.

[www.hino.com](http://www.hino.com)

**The New Conduit Locknut Wrench by Klein Tools**

Klein Tools introduces the Conduit Locknut Wrench, an innovative tool designed to easily loosen and tighten conduit connectors in tight or deep cut-in boxes.

Perfect for remodel work where the cut-in boxes are filled with existing wires, the Conduit Locknut Wrench (Cat. No. 56999) features two wrench heads for ½” and ¾” conduit connectors. Using a patented drive shaft, the wrench heads rotate each other when twisted. This eliminates the need for side to side tool movement. Each wrench head also features a hole for a screwdriver as a lever to enable more torque on extra tight connectors.

Conduit Locknut Wrench features include: Easily attach locknuts in tight or deep cut-in boxes. For ½” and ¾” connectors. Heavy duty steel construction enables needed torque for extra tight connections.

“Typical methods for tightening or loosening conduit connectors, like a hammer and screwdriver, a pair of pliers or your fingers, rarely work well because of the limited range of motion inside a tight or deep cut-in box,” says David Mueller, senior product manager at Klein Tools.

**Milwaukee Tool Expands Its M12 Thermal Imager**

Milwaukee Tool continues to expand its M12™ offering with the introduction of the new M12™ 7.8KP Thermal Imager, featuring the highest pixel density in its class and new DUAL SENSE™ pixel technology for superior definition of hot and cold details within the same image. Ideal for service professionals, the new Imager provides an affordable solution for predictive maintenance or troubleshooting applications, taking high-quality images that rival more expensive imagers on the market, in a more compact and easy-to-use design.

Designed from the ground-up with the professional tradesman in mind, the 7.8KP Thermal Imager gives users unmatched detail to view the quality of construction, inspect hard-to-evaluate systems, and understand the extent of damage instantly. Exclusive DUAL SENSE™ technology allows the Imager to individually optimize pixels to eliminate the blurring of hot and cold details in complex scenes. Equipped with 83:1 distance-to-spot performance, dual lasers, and hot/cold spot locators, users are able to quickly scan, target and capture temperature readings from long range or small areas.

**Workrite Uniform Company's  
New Multi-Hazard Protection  
Line- Nomex MHP**

Workrite Uniform Company is proud to present a line of multi-hazard protection (MHP) flame-resistant (FR) workwear: Nomex® MHP by Workrite® FR.

The Nomex MHP fabric protects workers against multiple thermal hazards, including arc flash, heat and flame, and small molten metal splatter, while maintaining comfort and durability.

Designed to absorb moisture and dry faster, Nomex MHP keeps workers comfortable on the job. The inherent fabric properties in this line make for longer-lasting workwear with less shrinkage, good color fastness and excellent appearance retention after multiple launderings. The Nomex MHP line includes a work shirt, two pants and a coverall.

The result is a line that offers greater protection, comfort and long-term value.

## POWER. HARNESSSED.

MSA's premium **EVOTECH® Arc Flash-Rated Harness** provides outstanding arc flash protection\* for utility company employees and contractors who work at heights. Its rugged design looks good on the job and is 30% lighter than comparable harnesses. Made from 100% Kevlar webbing, the EVOTECH Harness is fire-resistant, so it maintains its performance in the event of a fall after an arc flash.

MSA's **Workman® Arc Flash-Rated Harness** provides excellent arc flash protection\* in a sleek, black design that's lightweight and comfortable. The high-strength nylon is designed to maintain its integrity after exposure to an arc flash and in the event of a fall. The Workman Arc Flash harness is a cost-effective option for safety managers and contractors who need to be compliant to the latest electrical requirements without breaking the budget.
