# ROME

Manufacturing Heavy Duty Construction and Agricultural Implements Since 1932

## ROME PLOW COMPANY IMPLEMENTS

The ROME brand name has always been tied to heavy duty Construction and Agricultural disc plows.

ROME continues to manufacture the same style of implements that has made the ROME PLOW brand name famous for over 80 years.

ROME also manufactures pivot dump and ejector scrapers for the AG and Construction Industries.

This includes a full line of Earth Moving Scrapers and precision land levelers, such as land planes and float planes.

For more information on our products or for the closest authorized ROME dealer please contact us.

Dealer Inquiries Welcome

**Peterbilt Motors Company Host Two-Day Body Integration Course**

Peterbilt Motors Company hosted its two-day Body Integration course at the Denton, Texas manufacturing facility.

The course featured Peterbilt segment managers and experts speaking on important topics such as electrical architecture, software updates, system programming, chassis information and body company support.

Peterbilt has established the Body Integration course to educate class attendees on these product components and services to streamline the body integration process on Peterbilt trucks.

“Peterbilt continues to improve our joint processes and relationships with body builder companies,” said Jorge Medina, Director of Marketing. “We see the Body Integration course as a necessary education tool for this progress.”

**Takeuchi-US Appoints Michael Shebetka to Product & Training Manager**

Takeuchi-US, a global innovation leader in compact equipment, has announced they have appointed Michael Shebetka to the position of product and training manager. The move follows the promotion of David Caldwell to national product manager.

As product and training manager, Shebetka will be in charge of product information and training for both dealers and field representatives. Additional responsibilities include performing the role of product trainer at Takeuchi’s national training events at the Pendergrass, Georgia, U.S. headquarters, as well as out in the field.

Shebetka was previously employed by Takeuchi-US for nearly five years starting back in 2003 as the regional sales manager in the Southeast and Western U.S. He moved back to his hometown of Cedar Rapids, Iowa, to be the outside sales representative for Martin Equipment. During his time there he sold John Deere construction and forestry equipment in an Iowa territory.

“Michael has a range of industry experience from both the distribution side and manufacturing side that will be of great benefit in his new role at Takeuchi,” said David Caldwell, national product manager, Takeuchi-US.

## Manitou Welcomes Briggs Equipment, Inc. to the Dealer Network

Manitou, the world leader in all-terrain material handling equipment, is pleased to welcome Briggs Equipment, Inc. to the Manitou dealer network. Briggs Equipment will partner with Manitou to sell the heavy capacity telescopic handlers and rotating telescopic handlers at the following locations: Dothan, AL; Mobile, AL; Jacksonville, FL; Miami, FL; Orlando, FL; Tampa, FL; Atlanta, GA; Baton Rouge, LA; Lafayette, LA; Lake Charles, LA; and New Orleans, LA; Abilene, TX; Austin, TX; Beaumont, TX; Brownsville, TX; College Station, TX; Corpus Christi, TX; Dallas, TX; Freeport, TX; Houston, TX; Laredo, TX; McAllen/Pharr, TX; San Antonio, TX. "We are proud to have Briggs Equipment, Inc. join our Manitou dealer network," said Eric Burkhammer, Manitou Americas Vice President of Sales and Marketing. "Briggs Equipment is one of North America's largest dealers in industrial and construction equipment and we are confident that given their track record in the market, they will provide expert sales, service and parts for Manitou equipment." Chris Meinecke, President and COO of Briggs Equipment stated, "through our long, illustrious history we have chosen to only partner with leading manufacturers that offer something innovative to our customer base."

## Hanse International, Inc. Names Lisa Hansen Beebe Company President

Hanse International, Inc. is proud to announce the promotion of Lisa Hansen Beebe to company President. Beebe replaced longtime company President John Seehof, who retired, yet remains as a consultant to the company. Beebe began her career with Hanse International, Inc. in Waukegan, Illinois and moved when the company relocated their manufacturing facilities to Lexington, South Carolina. For 22 years Beebe has effectively held a variety of positions with Hanse International, Inc., from Sales to Human Resources and more recently company Vice President. "Her experience and loyalty to the company speaks volumes of her, not only as a valued member of this company, but as an overall person," said John Seehof, former President of Hanse International, Inc. "Over the years, Beebe has displayed, through her various roles, the type of leadership, dedication, and versatility that is necessary to succeed in this industry."

Hanse International was founded in 1920, the tradition of quality, customer service, and growth continues today as seen through markets such as heavy truck, class 6, 7 and 8, utility/service, and fire & emergency.

# HoistCam Director Provides Construction Managers with Upgraded Technology and Licensing Options for Jobsite Monitoring

Netarus LLC, announces the full-scale launch of HoistCam™ Director enterprise fleet monitoring software. HoistCam Director enables construction owners and managers to remotely monitor an entire job site via HoistCam, SiteCam and other cameras or drones. By capturing data from integrated sensors, the software provides GPS recording, geofencing, and searchable archives of recordings.

Following two years of beta testing with customers around the world, the full-scale launch of HoistCam Director includes some technology improvements and expanded licensing options for customers. “We’re confident that HoistCam Director is robust, accessible, and reliable, enabling contractors to make better, more informed decisions,” said Chris Machut, Chief Technology Officer for Netarus LLC. Among the upgrades are multiple camera angles, shake-resistant video, and clear line-of-sight monitoring.

“In addition, customers provided feedback that they were interested in flexible licensing options. “We listened, and now offer two levels of licensing—Basic and Enterprise,” said Machut.

Providing a centralized monitoring point, HoistCam Director is more than just a one-way camera system. A fully integrated system allows construction owners and general contractors to view and manage hundreds of job sites or equipment operations, improving productivity and safety.

Among the benefits for project managers is the ability to align written assignments with current real-time visual comparisons of the job progression. They can also collaboratively manage work flow and share information within the organization or with various sub-contractors. Operations managers or CEOs can increase productivity and profits by deploying or re-deploying personnel or equipment assets based on real-time needs. Risk managers can quickly assess operations to reduce opportunities for accidents or retrieve archived data following an accident for efficient incident investigation. In addition, certain insurance carriers may provide premium discounts to contractors who use HoistCam Director to capture critical activity on the job site.

HoistCam Director transfers video and images to a mobile digital video recorder (MDVR), which captures and stores

A Woman Owned Small Business

"From the simplest to the complex, Jesco does it best!"

### DIAMOND WIRE MESH ENCLOSURES

Time tested diamond mesh partitions have been pre-engineered for easy installation, give an unrestricted view into the cage, total air circulation, low initial cost and maintenance. Send us the footprint of your project and allow our engineers to assist you on your next project!

### SELF DUMPING HOPPERS - 50+ Sizes and Specials!

All welded self dumping hoppers are available in more than 50 different sizes that will fit to your application. All units are engineered to return to an upright position and have a positive locking latch. Safety retaining chain and trip rope assembly is standard on all our units. Open-sided, low profile, narrow, extra wide, and 10,000# capacity units are all within our product line. Casters available on standard units up to the 2½ cubic yard size.

### WIRE MESH INFILL PANELS

We will custom fabricate these infill panels to meet your specific requirements. Just send us your specs!

Available in diamond, rectangular and square mesh, with or without standoffs. Frames available in 1" x ½" channel or with a hemmed edge. Other size framing materials and mesh are available, specify weld pattern and types of weld finish desired. Division 5,8 and 10.

### EEZY STAK® Enclosures

2" x 1" Rectangular Mesh EEZY STAK® Enclosures are designed and engineered to save time and money on your project installation. Woven wire mesh panels welded into an angle frame; frames secured to the posts. No wire ties or unheard of specialty clips. Jjust nuts, bolts, and standard hand tools are required. Dark Gray painted panels allow for full visibility into enclosure.

[www.bucrope.com](http://www.bucrope.com)

data from up to eight HoistCam cameras. The MDVR can be configured to automatically upload to the cloud for analysis or archive.

## Components and Features

- HoistCam Director includes one mobile digital video recorder (MDVR) with 4 channel video input, a Video Receiver Box (VRB) with three video inputs and one wireless receiver for HoistCam, one SiteCam with 20 ft. extension cable, and 5 Amp 12VDC power supply.
- Among the customizable alarms and interfaces are geo-fencing, Shock/G-Sensor, temperature sensor, voltage output triggers, and RS485/RS232 monitoring.
- Other system considerations include choice of cellular, Wifi or Ethernet communication, site tracker services with custom safety or logistics reports, and storage on in-house servers or HoistCam hosted servers.
- HoistCam Director is currently supported for Microsoft Windows® 7 and 8. Coming soon is support for Mac, IOS® (iPhone® and iPad®) and Android.
- Two licensing options provide users with flexibility to customer according to the size and scope of their projects. A Basic License allows for one concurrent user and MDVR at no additional cost. An Enterprise License supports multiple concurrent users, MDVRs and remote access to recordings.

“Aside from actually witnessing a particular activity in progress, knowing when materials arrive from a supplier or when mission-critical tasks are being completed on site can greatly increase our management team’s ability to track construction progress on any given project from any location,” said Geoff Bean, Virtual Construction Coordinator for W.M. Jordan Company, which participated in the beta testing of HoistCam Director. W.M. Jordan Company is a regional general contractor serving Virginia and the Carolinas; the company is regularly ranked on *Engineering News Record’s* Top 400 Contractors list. While HoistCam Director is ideal for construction job sites, it also has application in heavy industry and manufacturing where overhead cranes are used or in maritime logistics operations.

# Manitou Americas Releases All-New Edge<sup>®</sup> Pickup/Hopper Broom Waterless Abatement System

*"The new EDGE Pickup/Hopper Broom with a Waterless Dust Abatement System is a cost-effective investment for contractors and rental houses"*

Manitou Americas, Inc. announces the All-New EDGE® Pickup/Hopper Broom with a Waterless Dust Abatement System to their broom lineup for compact loader attachments.

The new EDGE Pickup/Hopper Broom with a Waterless Dust Abatement System is a cost-effective investment for contractors and rental houses. It provides excellent performance in milling applications, material pickup, parking lot, road maintenance and job-site cleanup. This unit works well for indoor application cleanup, as it features a "waterless" dust abatement system.

The new Pickup/ Hopper Broom with a Waterless Dust Abatement System features:

- A large industrial filter, eliminating potentially large dust clouds
- 12 volt shaker dislodges loose debris from the filter directly into the hopper
- A slotted brush assembly allowing the brush to move vertically for ease of operation
- A hydraulic cylinder that drops the bucket floor when dumping dirt and debris
- Two caster wheels mounted on the side toward the front of the broom to prevent the user from rolling too far forward, preventing damage to the skirting and the frame

The EDGE Pickup/Hopper Broom with a Waterless Dust Abatement System comes complete with hoses and couplers as well as a bolt-on cutting edge to fit most compact loaders. This unit is available in 60", 72" and 84" widths.

# Maxi-Power™ Mobile Generators

## Allmand™ Expands into the Mobile Generator Market

**Allmand Bros. Inc.**, a subsidiary of Briggs & Stratton Corporation and long-time manufacturer of high-performance portable equipment, expands its product offerings with the introduction of **Maxi-Power™ Mobile Generators**. The line includes seven easily maneuverable generators ranging in output from 25 to 150 kilovolt amps to accommodate a variety of applications.

“Our Maxi-Power generators are designed with reliable performance and convenience in mind — hallmarks of all of our Allmand equipment,” said Brian Northway, Allmand product manager. “We know our customers require high productivity, so our generators incorporate features that contribute to exceptional efficiency and minimal maintenance. Plus, like all Allmand equipment, it’s easy to transport.”

A heavy-duty, oversized alternator with separate excitation winding provides the capacity to easily start large motors and seamlessly handle variable loads. The automatic voltage regulator quickly adjusts to provide stable and consistent voltage for powering even the most sensitive equipment. For flexibility on any jobsite, Maxi-Power generators easily switch between 50- and 60-Hertz frequencies. All models adjust between 120, 240 and 277 volts in single-phase power and 208, 240, 415 or 480 volts in three-phase.

An electronic governor maintains engine speed independent of the load to provide consistent power. The Maxi-Power series features programmable start and stop capabilities for use as a standby system, allowing ease of mind and operator-free starting.

Maxi-Power generators are designed for worry-free operation. A large capacity fuel tank allows for more than 24 hours of operation before refueling. Additionally, external fuel connections extend operational time by allowing the unit to run off outside fuel. Should a Maxi-Power generator run out of diesel, the electric fuel primer and air-bleed (EFPA) pump allow for easy restarting without requiring service for priming. A high-capacity cold start battery provides extra amps for reliable starting in any climate or condition.

Maxi-Power generators feature design elements that reduce maintenance and protect the equipment, operators and jobsite. A dual filtration system, protected in an acrylic filter housing, removes fine contaminants to enhance protection and prolong engine life. Designed for 110 percent full-fluid containment, the unit captures all leakage in an internal reservoir to avoid site contamination. Additionally, a lockable switch voltage selector protects the engine by preventing the operator from switching voltage while the engine is running.

All fluids are plumbed to the curbside edge of the generator’s enclosure for easy maintenance access. Likewise, all lugs and receptacles are on the machine’s curbside or rear to improve operator safety during maintenance checks. Bolt-on steel fenders allow for convenient

in-field servicing, eliminating the need for welding. For added convenience, a 120-volt GFCI receptacle can be used in any voltage setting while oversized electrical lugs provide a wide range of connectability options.

Durable 15-inch tires provide long wear life and easy towing. In addition, an adjustable coupler channel enhances towing ease by allowing the trailer to be towed level to the ground.

Each generator features a power-maximizing diesel engine. The smallest unit in the Maxi-Power line, the MP25, uses a 33.3-horsepower engine and provides 20 kilowatts of prime power. The next smallest, the MP40, has a 27-horsepower engine for 30 kilowatts of prime power. The MP45 runs on a 59-horsepower engine, providing 36 kilowatts of prime power. The mid-range models are the MP65-8B1 and MP65-8C1, which feature 98- and 76-horsepower engines, respectively, and each produce 50 kilowatts of prime power. The MP125, which is only available in Canada, features a 152-horsepower engine for 100 kilowatts of prime power. The largest unit, the MP150, uses a 190-horsepower engine and produces 120 kilowatts of prime power.

Allmand backs its Maxi-Power portable generators with a two-year or 2,000-hour product and engine Limited Warranty. Complete warranty details available in the operator’s manual or online.

# New Honeywell Headset Integrates Bluetooth so Workers can Stay Connected While Protecting Hearing

*Bluetooth wireless technology allows users to take phone calls, connect with other workers through protective headset hands free; Technology filters noise to safe levels without affecting phone conversations*

Honeywell today announced a new protective headset designed to allow workers to stay connected while continuing to protect hearing on noisy job sites.

The new Honeywell Howard Leight™ Sync® Wireless protective earmuffs integrate Bluetooth wireless technology allowing workers to talk on the phone, connect with co-workers, get instructions and perform tasks without sacrificing hearing protection in noisy or dangerously loud environments.

“Noise-induced hearing loss is a significant safety risk in industrial and commercial settings, so ensuring workers keep hearing protection in place at all times is critical,” said Lisa Steckert, product manager, hearing protection, for Honeywell Industrial Safety, a recognized global leader in personal protective equipment and gas detection technology. “With Sync Wireless, workers who rely on smart phones or need to stay connected with co-workers or their supervisors in noisy environments can stay connected and productive without sacrificing safety.”

The headsets connect wirelessly via Bluetooth to most smartphones and features a boom microphone that enables workers to answer calls and carry on clear phone conversations while keeping the phone safely in a pocket. The wireless format eliminates the need for cords or cabling that

can pose trip, slip or hand hazards.

“Slipping off a headset to take a call creates safety risks,” said Steckert. “Honeywell is committed to adapting new technologies to keep workers and their job sites connected and safe.”

Features of the new headset include:

- Bluetooth 4.1 offers improved connectivity and reliability of data transfer and use with 4G cell phones.
- Ergonomic design for simple operation, with volume control buttons and flashing colored lights to indicate different settings
- Boom microphone provides crystal-clear communication in noisy environments and rotates out of the way when not in use.
- Volume management technology limits output volume from portable audio devices to 82 dB; air flow control technology provides optimal noise reduction across all frequencies to NRR 25.
- Steel headband construction and padded earcups for long-wearing comfort and use. + hour rechargeable battery.

**Mi-T-M Corporation Releases New 3000 Watt Inverter Generator**

Mi-T-M Corporation announces the release of the new 3000 Watt Inverter Generator. Designed with inverter technology, the new 3000 watt generator provides clean and quiet power for job sites as well as camping and recreational activities.

Compact and easy to move this generator features a 212cc Mi-T-M overhead valve engine with low-oil shutdown and recoil start. Its insulated side panels reduce noise making this inverter an efficient and cost-effective quiet power source in noise restricted areas. With 3000 watts of power, use it on jobsites to power your tools and charge your battery packs with the DC/battery charging capabilities.

Copper windings and an alternator total harmonic distortion (THD) of less than 3% provides power for sensitive electronic equipment such as laptops, sound systems and cellular equipment.

When more power is needed, utilize the parallel connection port box accessory. This option connects two Mi-T-M inverter generators together to utilize the power of two units at once.

[www.mitm.com](http://www.mitm.com)

**E-Z Drill's Cost Effective Rental Program**

E-Z Drill's rental program provides contractors a cost-effective method to complete concrete dowel drilling jobs. The program is offered throughout more than 60 E-Z Drill dealers across North and South America, Europe, Asia and Australia, and it allows customers to rent or re-rent E-Z Drill's most popular units and Dust Collection Systems.

"We understand that contractors might not be ready to buy a new drill," said Rick Walstad, E-Z Drill president and CEO. "This program offers a solution to those who do infrequent concrete drilling and doweling or who are just getting started in the business. They have a less expensive way to achieve the production, efficiency, and ease of use that comes with E-Z Drill."

The rental program allows contractors to take on jobs they may typically avoid such as full-depth repairs or patchwork. This added flexibility increases profits and helps them to better service their customers. Contractors also have the opportunity to try the units before they purchase so they are familiar with the drills and can determine which model will best suit their applications.

| ERGONOMICS<br>OFF-140.1.US | 1. Are workstations configured so that employees can achieve ergonomically correct working postures? | Workstations should be configured to prevent common ergonomic problems. The computer keyboard and mouse should be within easy reach and at a comfortable height (elbow high), the keyboard and monitor should be aligned, and the screen should be at or slightly below eye level. There is no one-size-fits-all solution. There are many factors to consider. |             |        |        |          |
| OFF-140.2.US               | 2. Are chairs used at workstations adjustable and in good condition?                                 | Chairs should be used so that employees can work in a comfortable seated position, with good body support. Chair height should allow feet to rest flat on the ground with thighs parallel to the   |             |        |        |          |
