John Deere Introduces TC-Series Trenchers as Latest Additions to Attachment Lineup

Designed to fit the needs of construction, agricultural, and landscaping professionals, John Deere debuted two new trencher models, the TC36 and TC48, to its family of attachments. The newly introduced TC36 and TC48 trenchers are ideal economic models for lighter-duty tasks and equipment rental. These attachment models are compatible on John Deere skid steers and compact track loader models, as well as most competitive models.

"We continue to expand our collection of time and cost-saving attachments by incorporating cutting-edge solutions that benefit our customers on the job site," said Jessica Hill, program manager, global attachments at John Deere. "The TC-series trenchers are an ideal solution to not only increase productivity, but also to increase uptime and lower daily operating costs while producing perfectly-shaped trenches."

The TC-series trenchers are designed for lower duty-cycle customers in agricultural and light construction applications with

TSE
INTERNATIONAL, INC.
1-800-825-2402

several configurations to match most soil conditions or trench requirements. To ensure enhanced productivity, the TC36 and TC48 trenchers come equipped with a spring-loaded trencher boom that reduces system shock. The carefully designed frame provides easy ingress and egress during use. The crumber boom pulls loose soil into the trenchers, leaving a clean bottom, and an auger removes spoils from trenches, increasing productivity on the job.

Another key quality of the TC36 and TC48 trenchers is the ability to increase the operator's uptime. The robust digging chain can be used for even the toughest conditions and the integrated skid shoe helps stabilization while trenching. The angle indicator provides customers an optimal trenching angle for more accurate and precise digging. By incorporating a low-profile drive system and side-shift, trenches will be nearly flush after every use. The multiple digging chain options combined with the low-profile drive system and side-shift help incur lower daily operating costs.

To learn more about the TC-series trencher attachments contact your local John Deere dealer or, visit www.johndeere.com.

About Deere & Company

Deere & Company (NYSE: DE) is a world leader in providing advanced products and services and is committed to the success of customers whose work is linked to the land - those who cultivate, harvest, transform, enrich and build upon the land to meet the world's dramatically increasing need for food, fuel, shelter and infrastructure. Since 1837, John Deere has delivered innovative products of superior quality built on a tradition of integrity. For more information, visit John Deere at its worldwide website at www.JohnDeere.com •

MADE FOR **MORE** TO KEEP PACE WITH **YOU**

You begin each day before dawn with a drive and determination to do **more** than the day before. When you move at this pace, you know to do more you need equipment that is made for more. That's why our utility line and land clearing equipment, like our **Forestry Mulchers and Aerial Trimmers**, is built from the ground up to meet your needs, delivering:

More Power and Production
Lower Operating Costs
Greater Reliability
Better Safety Features
Superior Operator Comfort and Control

If you're ready to operate equipment that's made to keep pace with you, then we invite you to go to morbarkdealers.com to find your local authorized Morbark or Rayco dealer. Your dealer will work with you to assess your needs now and in the future, as well as offer equipment recommendations, financing options, wear parts and service if you should ever need it.

Equipment is available for **SALE** or **RENT**.

Klein Tools® Adds Neck and Face Band to Line of Cooling Products

Klein Tools, for professionals since 1857, introduces a new addition to its line of cooling gear, the Neck and Face Cooling Band, to keep trade professionals cool and comfortable on the jobsite all summer.

Neck and Face Cooling Band (Cat. No. 60439)

- Cooling Band is made with super evaporative cooling performance knit fabric
- Anti-odor treatment for long lasting freshness
- Seamless, moisture-wicking fabric can be worn wet or dry
- When wet, cooling is immediate and can last for hours
- UPF 50+ protection from harmful UV rays
- Can be worn by itself or under a hard hat

POWER & TRACTION IN ACTION

ACHIEVER
RT-02 DD DIGGER DERRICK

ACHIEVER
DPM-52 TRACKED AERIAL

TRACKED DIGGER DERRICKS & AERIALS

- 57' working height (aerial)
- Exclusive hydraulic fold-out/removable bucket (digger derrick)
- Can be towed on a 10 ton trailer behind a line truck
- Sets up to 65' poles / 24" diameter
- 2.25 psi ground pressure (loaded), 17,500 lbs, 134 hp
- Super stable 45° hydraulic radial outriggers
- The shortest production lead times in the industry

LineWise Introduces Pole Stabilization System for Concrete, FlowFill™ Pouring Applications

The patent-pending Direct Embed Pole Stabilization (DEPS) system from LineWise is a new bracing system for holding concrete or steel poles in place while pouring concrete or FlowFill™. This cost-effective solution offers a quick and easy

setup that significantly reduces equipment and labor costs, in addition to other benefits, during the installation of direct embed poles.

The DEPS system consists of two adjustable pole braces for each pole that is being stabilized. The pole braces are first chained or strapped to the base section of a pole. Then, the anchor plates are staked into the ground, and the pole is then plumbed by simply extending or retracting the braces. The entire process can be completed in several minutes.

Compared to the traditional alternatives of using forklifts, telehandlers or deadman concrete anchors to support poles during construction, the DEPS system eliminates the cost of equipment rentals, machine maintenance, fuel and other various tools. The DEPS system offers a lower environmental footprint as well, as it helps cut jobsite emissions and results in fewer ruts created on right-of-ways due to less vehicle and equipment traffic.

Fully contracted, the DEPS system is 7.5 feet in length, allowing it to be transported in a pickup bed

OIL ALERT[®] **LIQUID LEAK DETECTOR**

DETECT OIL LEAKS AND SPILLS...FAST!

- **AVOID OPERATIONS SHUT-DOWN**
- **REDUCE ENVIRONMENTAL RISKS**
- **MINIMIZE COSTLY CLEAN-UP**
- **MONITOR OFF-SITE EQUIPMENT**

A small amount of oil (1/32 inch) seeping under Oil Alert activates its loud "on/off" alarm and/or relay contact output. The low profile dome shaped unit guards against undetected leakage in areas of oil lubricated / hydraulic equipment, stand-by generators, pressurized piping and fuel oil storage locations...
