# The Concrete Safety Solution

Often overlooked as a dangerous job, concrete truck drivers risk their lives at every assignment. With blind spots, difficult drop-off sites, and multiple personnel in the surrounding area; there is a multitude of obstacles and worryment to overcome.

However, truckers should rest assured that there is technology out there that is specifically designed to assist with these hurdles. Safety Vision, LLC is dedicated to creating mobile surveillance systems that mitigate hindrances in the industry; and with their complete concrete mixer solution, the support needed is embedded in the truck.

## **Observer 4401™ HVR**

<http://www.safetyvision.com/products/observer-4401-hvr>

Serving as the foundation of the solution, the Observer 4401 Hybrid Video Recorder (HVR) collects and retains all the vehicle's information, including the metadata and video footage. Equipped with two SD card slots, it can hold up to 512 GB of video, which is a substantial amount and vital to enforcing the most effective and safe operations.

By reviewing the array of recorded video, businesses can learn which practices need improvement, as well as which ones are favorable. These insights can then be shared with the truckers in order to improve their overall operational awareness. Moreover, businesses are empowered to turn these recordings into first-hand training videos for all established and new employees. This ensures that all personnel are knowledgeable and up to date about how to best follow their practices.

## **SV-EXTCAM HD**

<http://www.safetyvision.com/products/sv-extcam-hd>

By placing multiple cameras on the truck's exterior, the entire surrounding area is captured; making it easier for drivers to focus on the given task at hand. When the cameras act as the second pair of eyes for the vehicle, the trucker can devote their attention to their route and/or dropping off the concrete.

Additionally, exterior cameras provide protection against false claims. When the incident is captured on video, the "he said/she said" aspect is diminished, since all evidence is observed by the cameras.

## **CP4™ Monitor**

<http://www.safetyvision.com/products/cp4>

The CP4 monitor completes the solution, which allows the driver to see through the camera's lens in real-time. With multiple split screen views, the monitor is able to play 9 cameras at once: whether they be

# Rugged Dependability

STANDARD IN EVERY MACHINE WE BUILD!

Hogg & Davis has been proudly manufacturing utility line equipment for more than half a century.

Our trusted products are part of the fleets and tool cribs of nearly every investor-owned power and communications company in the United States and Beyond.

TEL 541.354.1001 • FAX 541.354.1080

WWW.HOGGDAVIS.COM

placed internally or externally. This product truly allows the driver to focus on the task by managing distractions: they no longer have to attempt to maintain complete visibility on the road, their surroundings, and the drop-off; they have a second pair of eyes right there with them.

Utilizing the monitor not only enhances visibility for the surrounding area, but also establishes a better view of the drop-off area. Drivers can rest assured that they are completing it in an optimal and efficient manner because their drop-off is on the screen in front of them. Safety is guaranteed.

While concrete truckers face many difficulties while on the road or at drop-off sites, Safety Vision's complete concrete surveillance solution offers that helping hand needed to ensure safety on the job. By using the system, truckers gain confidence in every facet of their job by depending on their surveillance system for security.

# John Deere Adds Industry-Exclusive Technology to GP-Series Motor Graders

- John Deere enhances the technology capabilities of its GP-Series motor graders with new automation features — Machine Damage Avoidance, and industry exclusives, Blade Stow and Auto-Gain for Cross Slope.
- SmartGrade™ motor grader technology further boosts operator productivity.
- John Deere will now include the factory-installed Premium Circle on all new SmartGrade motor graders, further increasing machine productivity and uptime.

John Deere expands the capabilities of its popular Grade Pro (GP)-Series of motor graders with new technology, including two industry-exclusive features, Blade Stow and Auto-Gain for Cross Slope. The new features, which also include Machine Damage Avoidance, deliver higher productivity, increased uptime and lower daily operating costs during operation.

“Our customers challenge us to find new ways to incorporate smart technologies into Deere products. They are looking for solutions to help make equipment easier to run and more efficient,” said Luke Kurth, product marketing manager, motor graders. “These new features allow new operators

[2sales@utvint.com](mailto:2sales@utvint.com)

1-800-985-8665

[www.utvint.com](http://www.utvint.com)

to come up to speed more quickly, and all operators can take full advantage of the productivity of Deere graders. We are committed to delivering a differentiated customer experience by bringing innovation to the always-evolving construction industry.”

The technology updates include two industry-exclusive offerings, Blade Stow and Auto-Gain, providing greater simplification for the operator. Blade Stow, standard with machine presets or Automation Suite, adds a configurable setting to automatically stow the blade with the touch of a button. With Auto-Gain, the machine automatically adjusts the Cross Slope gain setting on the fly based on the operating conditions, eliminating the need for operators to make manual adjustments. Auto-Gain improves productivity for operators by ensuring accurate blade movement in ever-changing conditions.

The GP-Series motor graders can be further enhanced with optional Machine Damage Avoidance. When activated, the feature reduces the chance of downtime by preventing the moldboard from inadvertently contacting the tires, the cab steps or frame and the saddle from contacting the table. With this feature, operators can focus on the job at hand, improving productivity.

SmartGrade™ motor grader models received additional enhancements to the industry's first mastless motor grader for greater flexibility and productivity, including a larger file-processing capability, up to 20% faster file transfers and increased real-time kinematic (RTK) radio stability. SmartGrade machines are now compatible with network RTK and local positioning system (LPS) technology.

In addition, John Deere now includes the factory-installed Premium Circle on all new SmartGrade motor graders. The fully sealed bearing and pinion help reduce maintenance costs and downtime by eliminating wear inserts and ensuring the circle remains tight during operation, maximizing accuracy while also significantly boosting circle torque and speed. The addition of the package, combined with the power of the SmartGrade technology, will boost machine productivity and uptime, positively impacting contractors' bottom lines.

To learn more about the new offerings for the GP-Series motor graders, as well as the full line of John Deere construction equipment visit <http://www.johndeere.com/> or contact your local dealer.

## John Deere Delivers Power, Performance With Purpose-Built 700L PL40 Pipelayer-Ready Crawler

- The John Deere-designed and -manufactured 700L PL40 Crawler provides a powerful and rugged purpose-built solution for pipelaying applications.
- From the more powerful John Deere PowerTech™ engine to the enhanced lift capacity, the 700L PL40 delivers increased productivity and performance.
- Other key features include easy sideboom installation, a comfort-boosting cab and the seamless integrated pipelayer controls.

Purpose-built with customer needs top of mind, the John Deere 700L PL40 Crawler provides a powerful solution for pipelaying applications. Offering a lift capacity of 40,000 pounds, the John Deere-designed and -manufactured 700L PL40 model provides customers with operating ease and exceptional durability.

“Our customers face a multitude of challenges, from tight deadlines and budgets to adverse conditions, making it critical to have a dependable solution that can withstand the demands of the application,” said Matt Goedert, solutions marketing manager, John Deere. “With the 700L PL40, we are delivering a

Expanded Polypropylene Grade Ring System

## THE FASTEST AND LIGHTEST GRADE ADJUSTMENT SYSTEM.

### OVER 175,000 INSTALLED

Used for more than a decade in the municipal sewer industry Creutex Specialty Products is now making our Pro-Ring expanded polypropylene (EPP) grade system available to power utilities and the telecom industry. These rings are light weight, yet traffic rated and come in varying thicknesses from  $\frac{3}{4}$ " to 6" and we offer an angled or tapered ring as well. Our newest size has a 36" ID x 46" OD. Custom made sizes available.

AVAILABLE IN RECTANGULAR AND  
SQUARE SHAPES

800-345-3764 info@cretexseals.com www.cretexseals.com

purpose-built solution that instills confidence in the operator while also tackling challenges headfirst. There is no need for fabrication work, as the 700L PL40 comes ready to bolt on the customer's choice of sideboom. From increased visibility to enhanced controllability, the 700L PL40 delivers the performance our customers need on tough jobs."

Equipped with a 135-horsepower John Deere PowerTech™ PVS 6068 engine, the 700L PL40 model boasts more hydraulic power compared to the base machine. This improves overall engine performance and increases peak torque in the pipelayer-ready model. The closed-center, load-sensing hydraulic system includes a variable-displacement pump, and the amplified flow rates boost hydraulic performance. In addition, various controls, including Eco Mode, Auto Idle and Auto Shutdown, can be enabled through the sealed switch module to maintain productivity while reducing costs. The Eco Mode feature optimizes fuel economy by seamlessly adjusting the engine speed to meet the load. The Auto Idle and Auto Shutdown timers lower fuel costs and save warranty hours during inactivity or low use.

The purpose-built cab significantly reduces noise, increases visibility and enhances operator comfort in pipelaying applications. Customers can select a canopy cab option for additional visibility and improved communication on the job. Other notable features include an operator-focused design for easy entry and exit from the cab, a straight and center seat with excellent all-around visibility, and a standard rearview camera.

The seamless integration of pipelayer controls with the John Deere joystick controls further enhances productivity on the job site. The electrohydraulic sideboom control joystick combined with a proportional roller gives the operator precise control while using one hand to maneuver. The dual-path hydrostatic transmissions and the neutral counter-rotate setting deliver precise, predictable control along the trench without triggering abrupt movements. The built-in front console storage was conveniently designed so operators can cleanly install load-monitoring displays for easy viewing. The decel pedal offers multiple operator selectable modes, helping the operator customize his/her experience and increase ease of use.

Built at the John Deere factory in Dubuque, Iowa, the pipelayer-ready machine is designed to maximize uptime. The bolt-on design of the platform and mounting plates simplifies the installation of the customer's preferred sideboom, reducing machine downtime. Other features, including standard reversing fans with large fin spacings and improved idler shims, preload springs and easier track cleanout, further boast uptime. Additionally, improvements to the hose and harness routings over the previous models reduce wear and leak points. Extended service intervals and grouped maintenance points reduce time and costs. The fast fuel and quick fluid service options also reduce time, getting the machine back on the job sooner.

The 700L PL40 rounds out John Deere's lineup of pipelayer machines, which also includes the 850L PL100, 1050K PL170 and 1050K PL220. Machines in the PL lineup come with JDLink™ telematics for five
