# Creating a Safer Work Environment for Workers Removing Heavy Underground Network Access Lids

---

Underground infrastructure workers are challenged each day to remove heavy access lids to access the network. Manually removing heavy lids exposes workers to the risk of back, shoulder, hand, and foot injuries. This is a particularly challenging task for electric utility, telecom, airports and other organizations. These access lids can weigh in excess of 500 lbs and are very physically challenging to remove.

A large public utility contacted us in search of a solution to provide a safer, more efficient work environment for their field team. Their search was initiated as a result of two of their field team suffering severe back injuries attempting to manually remove covers weighing 600 lbs. After trying several products, The Lifter PLUS was the only product that offered an automated solution capable of removing the lids. Safely, efficiently, with the simple push of a button on a hand held remote. They now have multiple units installed on their field service fleet trucks to provide a safer work environment for their field teams.

A large telecom company contacted us in search of a product to provide a safer work environment for their field team challenged with removing covers weighing 700 lbs. They also experience worker injuries as a result of attempting to manually remove heavy network lids. The Lifter PLUS was the only automated solution they found capable of removing these very heavy, large diameter covers.

The Lifter and The Lifter PLUS are industry leading products that offer a vehicle mounted, automated solution to remove a broad range of cover sizes and weights. These products are easy to install and operate. They are powered by the vehicle battery and can make cover removal as simple as pushing a button on a hand-held remote. Safely, Efficiently. The Lifter for conventional size and weight lids, The Lifter PLUS for more challenging removal tasks.

## Custom Insurance for the Construction Industry

### With XINSURANCE, You Get...

- All-In-One Approach
- Agent Friendly
- Limits up to \$10MM
- Property & Casualty
- Professional Liability
- Commercial Auto Liability (available in most states)
- Products Liability
- Exclusions/Gaps in Current Coverage & More

XINSURANCE is powered by Evolution Insurance Brokers, LC ("EIB"), an excess and surplus lines insurance brokerage. XINSURANCE is a DBA of EIB, which is domiciled in and has its principal place of business in Sandy, Utah. This insurance product is offered by an unlicensed surplus lines insurer. The NPN for EIB is 5464658 and CA license number is OH93938.

## ALL Crane Invests in 21-Unit Liebherr Package

*Delivery has begun and continues through 2021*

ALL is reinvesting heavily in its mobile all-terrain fleet, announcing a massive haul of 21 new cranes from Liebherr that will be delivered throughout 2021. The package includes: four each of LTM 1120-4.1, LTM 1130-5.1, and LTM 1230-5.1; three each of LTM 1160-5.2 and LTM 1450-8.1; and one each of LTM 1110-5.1, LTM 1150-5.3, and LTM 1650-8.1. The most active period of delivery will be the heart of the year, with 16 of the cranes scheduled for delivery in the second and third quarters. The new acquisitions will be distributed throughout ALL's national footprint of three-dozen branches.

Michael L. Liptak, CEO and president of ALL Crane, said the purchase is emblematic of ALL's commitment to maintaining its fleet strength across the company's broad North American footprint. "We approach every package with an eye on customer demand, and what we have is a very expansive and diverse demand for ATs at all capacity levels and in every region," said Liptak. "These LTMs are scheduled for delivery throughout the year and will be ready to roll, supporting each of our yards and the customers they serve."

To that point, three of the units in the package are new models with an array of technologies and

1-800-985-8665

[www.utvint.com](http://www.utvint.com)

performance features designed to serve ALL's wide ranging customer mix and geographies.

The LTM 1120-4.1 offers the maximum lifting capacity (135-ton) and boom length on a 4-axle mobile, delivering performance previously only available on 5-axle cranes. The LTM 1150-5.3, introduced in October of 2020, is a 150-ton machine that offers a 10% longer telescopic boom and 15% higher capacity than its successful predecessor, the LTM 1130-5.1. Last but not least, the capacity leader of this spate of ATs coming to ALL's fleet, the LTM 1650-8.1, which made its debut at last year's Bauma trade fair, offers 770-ton capacity, exceeding its predecessor's capacity by between 15 and 50 percent, depending on the equipment package selected.

The purchase—and the new technologies on show—point to the continued popularity of all-terrain (AT) cranes with ALL's customers and in the markets in which they work. "Ongoing growth in road and bridge and general infrastructure engineering and construction are huge, as are expectations for the wind market. These are drivers of the continued demand for ATs," said Liptak. "This purchase also has a lot of cranes with longer booms, which give our customers added flexibility for commercial construction. We're also fortifying our fleet to support growth in new construction and expansion in manufacturing and industrial buildings."

Liptak notes that many of the Liebherr cranes in the package conform to road limits in ALL's major markets, also making them attractive to customers due to the ease of transport. "The mobility of our fleet, project to project, but also branch to branch, is important to us."

ALL is always working with manufacturers, explains Liptak, "sharing information to help create next generation technologies. This purchase further demonstrates our belief in the Liebherr product and our commitment to ensuring customers have the equipment they need, where and when they need it."

#### *About ALL*

*The ALL Family of Companies is the largest privately held crane rental and sales operation in North America. Their strategically located branches have access to one of the world's largest and most modern fleets, operating under the ALL, ALT, Central, Dawes and Jeffers names. ## ALLU Group Inc. Announces New Dealer for Tennessee

ALLU Group Inc. is pleased to announce Stowers Machinery Corp., headquartered in Knoxville, Tennessee, as its newest dealer for the full line of ALLU Transformer and ALLU Crusher material processing attachments. The company has six locations in Tennessee, and provides sales and rental of ALLU's unique attachments, as well as complete aftermarket service and spare parts, for customers throughout the state.

The partnership with Stowers Machinery as its Tennessee distributor reinforces ALLU's commitment to providing the greatest level of customer focus in the industry — combining local expertise and support with the benefits of ALLU's influence and prominence as a global company.

Stowers Machinery was established in 1960 in Tennessee by three brothers: Bud, Dick, and Harry Stowers. Beginning with three locations and 70 full-time employees, the company today has grown to encompass six locations, employing more than 400 personnel. Third-generation owners Lisa Stowers Rottmann and her husband, Ed Rottmann, continue to grow the business, while keeping true to the values of being a family-owned business.

According to Edison Rocha, ALLU Group Inc. Vice President Marketing, "We are pleased to have Stowers Machinery on-board with us as the newest member of our North American dealer network. ALLU already had several great customers in Tennessee. We believe Stowers' reputation of providing exceptional customer service is fully aligned with ALLU's way of doing business, and they also believe in the tremendous value ALLU's products can bring to their customers."

"Stowers Machinery is excited to partner with ALLU and their unique product offerings," says Larry Cummins, General Manager – Allied Division. "We feel the ALLU product line will provide unique portable screening and crushing solutions that will help our customers to be more productive, efficient, and profitable. Also, it is important to add that ALLU's commitment to product support will make this partnership a win for our customers, Stowers Machinery, and ALLU." •

## John Deere Joint Tests Its First Electric-Powered Backhoe with National Grid

- John Deere is working with National Grid, an electricity, natural gas, and clean energy delivery company, to joint test its electric backhoe concept.
- The John Deere-developed backhoe will be used on National Grid jobsites, proving out the concept to help further enhance and improve the electric vehicle design.

John Deere, a leading manufacturer of construction equipment, and National Grid, an electricity, natural gas, and clean energy delivery company serving more than 20 million people throughout the Northeast, will joint test an electric backhoe concept. The John Deere developed, battery-powered, electric vehicle design – referred to as E-Power – will target the ease of operation and performance level of the diesel-powered, 100 HP 310L Backhoe. The design is intended to provide substantially lower daily operating costs, lower jobsite noise, enhanced machine reliability, and zero emissions.

“We are excited to work with National Grid, a leader in promoting clean energy solutions, to test the John

# RENTAL EQUIPMENT THAT WORKS AS HARD AS YOUR CREW

Deere electric backhoe design in real-world conditions,” said Jason Daly, global director, production systems, technology and marketing, John Deere. “John Deere is committed to developing innovative, robustly tested, and reliable equipment for our customers, unlocking measurable value through the incorporation of smart technology solutions in our machines. This project is another stepping stone in our backhoe innovation journey, intended to lead to subsequent electrification testing and design refinement.”

The testing period will enable National Grid to expand its use of electric equipment on jobsites, reaffirming its commitment to leading the industry in the use of clean and resilient energy solutions.

“National Grid is one of only two energy companies in the US to add electric backhoes to their fleets,” said Badar Khan, President, National Grid, US. “We are excited to work with John Deere to take an important step in electrifying our company vehicles, which could be revolutionary for our industry. Decarbonizing transportation remains a challenge in the journey to net zero and we’re hopeful that bringing on more electrified heavy-duty vehicles and equipment will help us make significant progress.”

John Deere is in early Phase I development of its electric backhoe. To learn more about the John Deere backhoe lineup, visit [www.johndeere.com](http://www.johndeere.com) •

# The New Standard for Linemen

At Tallman Equipment, our priority is to set the standard in the electric transmission and distribution industry with an all-inclusive approach to serving our customers. Our vision to deliver a trio of quality, convenience, and reliability is driven by listening and adapting to the needs of our customers. As the industry changes, so does Tallman. As a result, Tallman Equipment has become a unique company within our industry offering a full range of professional services including tool sales, product distribution, rentals, and repair. Tallman is already a trusted name in stringing blocks, cable assemblies, fiberglass, and rope products – and we are excited to announce the addition of our new Rubber Goods Testing Lab.

## *Our Services Include:*

Groundset & Jumperset Manufacturing, Repair & Refurbishing

Transformer Sling Manufacturing & Rope Repair

Battery Power Tool & Equipment Repair

Fiberglass Tool Testing, Repair & Refinishing

Tool & Equipment Rental

Rubber Goods Testing & Refurbishment

*Trust* **TALLMAN**
