THE FUTURE IS BRIGHT.

WITH A NEW MANUFACTURING FACILITY, ADDITIONAL
SERVICE CENTERS AND EXPANDED SERVICE AND PARTS TEAM

We're more prepared than ever to deliver.

For more than 75 years, Terex Utilities has been a pioneer of insulated and digging equipment for the electric utility industry. Along the way, we've established a pattern of innovation and continuous improvement in order to deliver solutions so linemen can be productive and keep the lights on for their customers. This is an exciting time in Terex Utilities' history – with strategic investments being made in our manufacturing capabilities, our service footprint, new products, team members and overall customer experience. The future is looking bright, and we're excited to continue delivering equipment and service solutions to the electric utility industry – now better than ever.

Give us a call at 844-TEREX-4U for your equipment, service and parts needs.

WORKS FOR YOU.™

Introducing the New JLG® 2733 High-Capacity Telehandler

Expanding the company's popular product line

JLG Industries, Inc., an Oshkosh Corporation company and leading global manufacturer of mobile elevating work platforms (MEWPs) and telehandlers, expands its telehandler line to include a new high-capacity model — the 2733. With 26,600-lb maximum capacity, this model is the highest capacity telehandler that JLG offers and is purpose-built to handle and haul heavy, bulky materials; load and unload trucks and trailers; and help maintenance and repair personnel work on larger fleet equipment. The JLG® 2733 telehandler offers 33-ft of maximum lifting height and an 8,000-lb capacity at maximum reach for excellent capability throughout the entire load chart.

“The 2733 is designed to be a versatile machine that can adapt to a wide variety of job site challenges, as well as tackle demanding pick-and-carry applications in above-ground mining, wind energy, oil and gas, industrial construction and large-scale commercial construction projects,” says John Boehme, JLG senior product manager, telehandlers.

In fact, Boehme continues, with the wide range of specialized attachments available for high-capacity telehandlers, this new model can replace more traditional machines, such as wheel loaders,

Your Trusted Partner.

Partnering with Ring Power gives you access to a vast range of jobsite-tough products to round out your fleet. Ring Power carries machines from dozens of manufacturers to ensure you always have access to the right tools for your job.

Short-term, long-term or rental-purchase options available.

1-844-766-RENT • Utility.RingPower.com

that traditionally come with higher rental rates. “The 2733 can take the place of wheel loaders, in certain applications where greater lift height and forward reach is desired,” says Boehme. “Compared to a wheel loader, the 2733 offers greater versatility due to its lift height and forward reach, as well as better maneuverability due to its compact size, better travel speed and terrainability.”

The 2733 is equipped with performance-enhancing productivity features, including a two-speed hydrostatic transmission with optional ride control and boom float to improve load stability and promote smoother operation on uneven terrain. It also features a class-leading outside turning radius to provide excellent maneuverability on crowded job sites. This model’s spacious cab offers operators superior comfort with excellent visibility and intuitive controls.

Designed to give operators the ability to work with greater confidence, the 2733 comes standard with JLG’s Load Stability Indication (LSI) system, which senses when the telehandler reaches forward load capacity. It is also engineered with precision gravity lowering and soft stop boom controls to provide operators with better boom control for precision placement.

To further inspire operator confidence, JLG’s proprietary SmartLoad Technology is an available option on this new telehandler. The technology in this system combines attachment recognition with real-time load data, allowing

operators to handle materials with greater confidence. This three-part system includes attachment recognition, longitudinal stability indication (LSI) and a load management indication system (LMIS).

The 2733 can also be equipped with an optional right-side electronic mirror to give operators enhanced visibility on the right side of the machine. This system has three components: Two cameras (one facing forward and one facing the rear), an internal display located inside the cab and right-side cameras that replace the typical right-side external mirror.

Other optional features include a multifunction display and a reverse sensing system. The multifunction display features integrated, electronic load charts, a reversing camera, diagnostics and analyzer capability to further assist the operator during machine operation. The reverse sensing system is designed to alert the operator of rear obstructions with an audible alarm. This feature helps operators be more aware of their surroundings, especially on busy job sites.

The new 2733 telehandler is the third model in the JLG high-capacity telehandler line, which also includes the 1644 and 1732 models. You can see it working in the JLG Access Your World virtual experience.

John Deere Announces 2021 “Own It” Low Monthly Payment Program

- John Deere unveils its new 2021 “Own It” Low Monthly Payment Program, enabling customers to grow their fleets and become equipment owners.
- With various configurations available, the 316GR and 324G skid steer loaders, 317G compact track loader, 204L compact wheel loader and the 26G, 75G and 85G excavator models are included in the 2021 offerings.

John Deere unveils its 2021 “Own It” Low Monthly Payment Program, available for customers who want to own the quality and reliability of John Deere compact and mid-size equipment. Customers can utilize the low monthly payment program to get on the path to equipment ownership for a variety of compact and mid-size equipment models including the 316GR and 324G skid steer loaders, the 317G compact track loader, the 26G, 75G, and 85G excavators and the 204L compact wheel loader with specific factory-installed configurations.

The New Standard for Linemen

At Tallman Equipment, our priority is to set the standard in the electric transmission and distribution industry with an all-inclusive approach to serving our customers. Our vision to deliver a trio of quality, convenience, and reliability is driven by listening and adapting to the needs of our customers. As the industry changes, so does Tallman. As a result, Tallman Equipment has become a unique company within our industry offering a full range of professional services including tool sales, product distribution, rentals, and repair. Tallman is already a trusted name in stringing blocks, cable assemblies, fiberglass, and rope products – and we are excited to announce the addition of our new Rubber Goods Testing Lab.

Our Services Include:

Groundset & Jumperset Manufacturing, Repair & Refurbishing

Transformer Sling Manufacturing & Rope Repair

Battery Power Tool & Equipment Repair

Fiberglass Tool Testing, Repair & Refinishing

Tool & Equipment Rental

Rubber Goods Testing & Refurbishment

“Each year, our low monthly payment program helps us support our customers and empower them to become machine owners as they grow their businesses,” said Greg Bauer, Manager, Tactical Marketing and Production Systems. “The ‘Own It’ program provides customers with financial flexibility while promoting the growth of fleets and jobsite capabilities without breaking the bank.” Operators can own various compact and mid-size excavator models including the 26G with a canopy configuration or the cab configuration, as well as the 75G excavator and the 85G. Both mid-size excavators included in the program feature cabs and rubber crawler pad tracks.

For compact offerings, the 316GR, 317G and 324G skid steer small-frame loaders and 204L compact wheel loaders are available in a canopy or cab configurations. Customers can also purchase the 316GR with the EH joystick controls and the attachments performance package.

The ‘Own It’ program will run through October 31, 2021. Exclusions apply in the United States. To learn more about the Low Monthly Payment Program, contact an authorized John Deere Compact Equipment Dealer or visit <https://www.deere.com/ownit>.

About John Deere

JLG Supports OSHA's National Stand-Down to Prevent Falls in Construction Efforts

8th annual event takes place week of May 3-7, 2021

JLG Industries, Inc., an Oshkosh Corporation company and leading global manufacturer of mobile elevating work platforms (MEWPs) and telehandlers, will participate in OSHA's 8th annual National Stand-Down to Prevent Falls in Construction, the week of May 3-7, 2021. This event is held each year to raise fall hazard awareness across the United States, giving companies an opportunity to provide important safety training to help minimize the risks associated with falls from height.

"One of JLG's core values is safety," says Frank Nerenhausen, president, JLG. "As the access industry leader, we feel it's our responsibility to educate and advocate around safety, as well as to support the efforts of those working to do the same, whenever and wherever we can."

According to OSHA, a "Safety Stand-Down" is a voluntary event for employers to talk directly to employees about safety, such as educating on the serious dangers associated with falls, identifying risks on different types of job sites, focusing on proactively preventing fall hazards and reinforcing the importance of fall prevention behaviors.

For this year's Safety Stand-Down, JLG will focus on promoting ladder and scaffolding replacement products like low-level access lifts that minimize falls when working at heights up to 20-ft. JLG will also highlight the latest safety enhancements to its more traditional boom and scissor lift lines.

"Historically, JLG has visited various job site across the country to deliver Safety Stand-Down content. However, COVID-19 travel restrictions and safety considerations, coupled with a change in the way our custom-

ers prefer to do business, have caused us to rethink our approach and forge a new path," said Jennifer Stiansen, director of marketing, JLG.

She continues, "To support this year's event, we have developed a range of safety-focused content that will be made available across our social media channels and our online resource center #DirectAccess. Individuals and organizations will have access to this content for consumption on-demand throughout the week, as well as thereafter to promote fall prevention well into the future."

According to Stiansen, featured content will include daily "Safety Checks," videos, articles and blog posts containing tips and information for improving safety at height.

To access JLG resources that support OSHA's National Stand-Down to Prevent Falls in Construction week, find us on Twitter, Facebook, LinkedIn, Instagram and YouTube or visit #DirectAccess. •
